Journal of Cellular Plastics

Subject and Title Index *Vol. 8 / 1972*

Air Looding
Influence of Stirring Velocity and Air Loading on the Formation of Flexible Urethane Foams, *Nov./Dec., p. 304*

Allyl Alcohol
Flame-Retardant Rigid Polyurethane Foam from Allyl Glucosides, *May/June, p. 156*

Allyl Glucoside
Flame-Retardant Rigid Polyurethane Foam from Allyl Glucosides, *May/June, p. 156*

Ambient Cure
Polyols and Requirements for Ambient Cure Foams, *Mar./Apr., p. 90*

Bathrooms
The World's First Soft Bathroom, *Sept./Oct., p. 250*

Blowing Agent
New Furniture Foam Test Methods, *Sept./Oct., p. 256*

Bromine
Flame-Retardant Rigid Polyurethane Foam from Allyl Glucosides, *May/June, p. 156*

Castings, Wood
Urethane Cast Plastics in Furniture, *Jan./Feb., p. 45*

Cell Formation
Influence of Stirring Velocity and Air Loading on the Formation of Flexible Urethane Foams, *Nov./Dec., p. 304*

Cellular Vinyl
Quality Vinyl Foam Applications in Home Furnishings, *Jan/Feb., p. 52*

Chair Shells
Polyurethane Chair Shells, *Mar./Apr., p. 105*

Cold-Molding
Highly Resilient, Cold Molded Urethane Flexible Foam, *May/June, p. 134*

Composite Plastic Chair
The Double Shell Chair, *Jan./Feb., p. 30*

Cushioning Properties
Recent Significant Advances in Urethane Foam Technology, *Jan./Feb., p. 35*

Cushions
Quality Vinyl Foam Applications in Home Furnishings, *Jan./Feb., p. 52*
Derivation and Use of Equations for Loading Indentation Curves, *Mar./Apr., p. 82*
Comparison of Polyurethane and Latex Foams For Furniture, *Mar./Apr., p. 85*

Decorated Urethanes
Production Finishing of Molded Statuary and Decorative Accessories, *July/Aug., p. 211*

Deep Seating
Recent Significant Advances in Urethane Foam Technology, *Jan./Feb., p. 35*

Dehydrated Wep
Properties and Optimization of Polyester-Filler Systems, *Mar./Apr., p. 100*

Design
A Systematic Approach to a Rigid Urethane Foam Molding Line, *Sept./Oct., p. 270*

Design, With Structural Foam
Design Properties of Structural Foam, *Sept./Oct., p. 245*

Double Shell Chair
The Double Shell Chair, *Jan./Feb., p. 30*

Energy Absorbtive Foams
The World's First Soft Bathroom, *Sept./Oct., p. 250*

Environment For Aged
The World's First Soft Bathroom, *Sept./Oct., p. 250*

Environment For Infirm
The World's First Soft Bathroom, *Sept./Oct., p. 250*

Epoxy-Isocyanurate Foams
Epoxy-Modified Isocyanurate Foams, *May/June, p. 160*
Modified Isocyanurate Foams (II), *July/Aug., p. 194*

Epoxy-Urethane-Isocyanurate Foams
Epoxy-Modified Isocyanurate Foams, *May/June, p. 160*
Modified Isocyanurate Foams (II), *July/Aug., p. 194*

Finishing, Urethanes
Production Finishing of Molded Statuary and Decorative Accessories, *July/Aug., p. 211*

Fire Retardants
Flame-Retardant Rigid Polyurethane Foam from Allyl Glucosides, *May/June, p. 156*
A New Approach to the Preparation of Rigid Urethane Having Reduced Flame Spread and Smoker Levels, *Nov./Dec., p. 311*

Flame Retardant Properties
Trichlorobutylene Oxide Based Flame Retardant Rigid Polyurethane Foam, *Sept./Oct., p. 274*

Flame Spread
A New Approach to the Preparation of Rigid Urethane Having Reduced Flame Spread and Smoker Levels, *Nov./Dec., p. 311*

Flammability, Urethanes
High Resilience, Flame Resistant Polyether Urethane Foam, *July/Aug., p. 214*
Trichlorobutylene Oxide Based Flame Retardant Rigid Polyurethane Foam, *Sept./Oct., p. 274*
A New Approach to the Preparation of Rigid Urethane Having Reduced Flame Spread and Smoker Levels, *Nov./Dec., p. 311*

Flexible Foam—Urethane
High Resiliency "Cold-Molded" Urethane Foam, *Jan./Feb., p. 20*
Influence of Stirring Velocity and Air Loading on the Formation of Flexible Urethane Foam, *Nov./Dec., p. 304*
Unisystem—A New Concept in Urethane Foam Moldings, *Nov./Dec., p. 318*

Flexural Properties
New Furniture Foam Test Methods, *Sept./Oct., p. 256*

Foam Composite
The Double Shell Chair, *Jan./Feb., p. 30*

Foam Density
New Furniture Foam Test Methods, *Sept./Oct., p. 256*

Foam Molding
Recent Significant Advances in Urethane Foam Technology, *Jan./Feb., p. 35*
Communications in Moldmaking, *Sept./Oct., p. 268*

Foam Seating
High Resiliency "Cold-Molded" Urethane Foam, *Jan./Feb., p. 20*

Formulating Foams
Highly Resilient, Cold Molded Urethane Flexible Foam, *May/June, p. 134*
Trichlorobutylene Oxide Based Flame Retardant Rigid Polyurethane Foam, *Sept./Oct., p. 274*

Functional Plastic Chair
The Double Shell Chair, *Jan./Feb., p. 30*

Furniture
Urethane Cast Plstics in Furniture, *Jan./Feb., p. 45*
Home Furnishings: polyesters or polyurethanes? *July/Aug., p. 190*
Design Properties of Structural Foam, *July/Aug., p. 245*

Furniture Foams
New Furniture Foam Test Methods, *Sept./Oct., p. 256*

Furniture Parts
A Systematic Approach to a Rigid Urethane Foam Molding Line, *Sept./Oct., p. 270*

High Resilience Foams
High Resiliency "Cold-Molded" Urethane Foam, *Jan./Feb., p. 20*
Recent Advances in Urethane Foam Technology, *Jan./Feb., p. 35*
Polyols and Requirements for Ambient Cure Foams, *Mar./Apr., p. 90*

Home Furnishings
Home Furnishings: Polyesters or Polyurethanes? *July/Aug., p. 190*

Hospital Environment
The World's First Soft Bathroom, *Sept./Oct., p. 250*

Impact Properties
New Furniture Foam Test Methods, *Sept./Oct., p. 256*

Integral Skin Form
Recent Significant Advances in Urethane Foam Technology, *Jan./Feb., p. 35*

Isocyanates
High Resiliency "Cold-Molded Urethane Foam, *Jan./Feb., p. 20*
Flame-Retardant Rigid Polyurethane Foam from Allyl Glucosides, *May/June, p. 156*

Isocyanurate Foams, Modified
Epoxy-Modified Isocyanurate Foams, *May/June, p. 160*
Modified Isocyanurate Foams (II), *July/Aug., p. 194*

Latex Foam
Comparison of Polyurethane and Latex Foams for Furniture, *Mar./Apr., p. 85*

Mechanical Properties
Derivation & Use of Equations for Loading Indentation Curves, *Mar./Apr., p. 82*
A Note on the Mechanical Strength of Self-Skinning Foams, *July/Aug., p. 208*
Effect of Voids on the Compressive Strength of Molded Rigid Urethane Foam, *Nov./Dec., p. 331*

Microcellular Foam
Unisystem—A New Concept in Urethane Foam Moldings, *Nov./Dec., p. 318*

Mold Making
Communications in Moldmaking, *Sept./Oct., p. 268*

Molded Foam
Polyurethane Chair Shells, *Mar./Apr., p. 105*

Molded Rigid Urethanes
Effect of Voids on the Compressive Strength of Molded Rigid Urethane Foam, *Nov./Dec., p. 331*

Molding
Unisystem—A New Concept in Urethane Foam Moldings, *Nov./Dec., p. 318*

Molding, Rigids
Molding Rigid Polyurethane Foam, *May/June, p. 144*

Molding Thermoset Foams
A Systematic Approach to a Rigid Urethane Foam Molding Line, *Sept./Oct., p. 270*

Nucleation
Influence of Stirring Velocity and Air Loading on the Formation of Flexible Urethane Foams, *Nov./Dec., p. 304*

Office Furniture
The Double Shell Chair, *Jan./Feb., p. 30*

Omalon®
Recent Significant Advances in Urethane Foam Technology, *Jan./Feb., p. 35*

Optimization
Properties and Optimization of Polyester-Filler Systems, *Mar./Apr., p. 100*

Oxyalkylation
Trichlorobutylene Oxide Based Flame Retardant Rigid Polyurethane Foam, *Sept./Oct., p. 274*

Physical Foam Properties
Trichlorobutylene Oxide Based Flame Retardant Rigid Polyurethane Foam, *Sept./Oct., p. 274*

Plastic Chair
The Double Shell Chair, *Jan./Feb., p. 30*

Plastic Composites
The Double Shell Chair, *Jan./Feb., p. 30*

Plastic Furniture
The Double Shell Chair, *Jan./Feb., p. 30*

Polyester-Filler Systems
Properties and Optimization of Polyester-Filler Systems, *Mar./Apr., p. 100*

Polyester Foams
Properties and Optimization of Polyester-Filler Systems, *Mar./Apr., p. 100*
A Note on the Mechanical Strength of Self-Skinning Foams, *July/Aug., p. 208*

Polyether Foam
Comparison of Polyurethane and Latex Foams for Furniture, *Mar./Apr., p. 85*
Polyols and Requirements for Ambient Cure Foams, *Mar./Apr., p. 90*
Flame-Retardant Rigid Polyurethane Foam from Allyl Glucosides, *May/June, p. 156*

Polymer Structure
New Furniture Foam Test Methods, *Sept./Oct., p. 265*

Polymeric Isocyanate
Unisystem—A New Concept in Urethane Foam Moldings, *Nov./Dec., p. 318*

Polyurethane Foam
Comparison of Polyurethane and Latex Foams for Furniture, *Mar./Apr., p. 85*
Polyols and Requirements for Ambient Cure Foams, *Mar./Apr., p. 90*
Polyurethane Chair Shells, *Mar./Apr., p. 105*
Flame-Retardant Rigid Polyurethane Foam from Allyl Glucosides, *May/June, p. 156*
New Furniture Foam Test Methods, *Sept./Oct., p. 256*
Unisystem—A New Concept in Urethane Foam Moldings, *Nov./Dec., p. 318*

Primary Hydroxyl
Polyols and Requirements for Ambient Cure Foams, *Mar./Apr., p. 90*

Properties
Properties and Optimization of Polyester-Filler Systems, *Mar./Apr., p. 100*

Purchasing Specifications
A Systematic Approach to a Rigid Urethane Foam Molding Line, *Sept./Oct., p. 270*

Reaction Kinetics
Influence of Stirring Velocity and Air Loading on the Formation of Flexible Urethane Foams, *Nov./Dec., p. 304*

Reinforcements
Polyurethane Chair Shells, *Mar./Apr., p. 105*

Rigid Foams
Epoxy-Modified Isocyanurate Foams, *May/June, p. 160*
Modified Isocyanurate Foams (II), *July/Aug., p. 194*
A Study of Polyether-Polyol-and Polyester-Polyol-Based Rigid Urethane Foam Systems, *July/Aug., p. 201*
Trichlorobutylene Oxide Based Flame Retardant Rigid Polyurethane Foam, *Sept./Oct., p. 274*
A New Approach to the Preparation of Rigid Urethane Having Reduced Flame Spread and Smoker Levels, *Nov./Dec., p. 311*

Unisystem—A New Concept in Urethane Foam Moldings, *Nov./Dec., p. 318*

Rigid Low Density
Polyurethane Chair Shells, *Mar./Apr., p. 105*

Safety
The World's First Soft Bathroom, *Sept./Oct., p. 250*

Screw-Holding Strengths
New Furniture Foam Test Methods, *Sept./Oct., p. 256*

Self-Skinning
Molding Rigid Polyurethane Foam, *May/June, p. 144*
A Note on the Mechanical Strength of Self-Skinning Foams, *July/Aug., p. 208*

Semi-Flexible Foam
Unisystem—A New Concept in Urethane Foam Moldings, *Nov./Dec., p. 318*

Smoke
A New Approach to the Preparation of Rigid Urethane Having Reduced Flame Spread and Smoker Levels, *Nov./Dec., p. 311*

Stirrer Velocity
Influence of Stirring Velocity and Air Loading on the Formation of Flexible Urethane Foams, *Nov./Dec., p. 304*

Structural Foam Furniture
The Double Shell Chair, *Jan./Feb., p. 30*
Design Properties of Structural Foam, *Sept./Oct., p. 245*

Test Methods
New Furniture Foam Test Methods, *Sept./Oct., p. 256*

Thermal Stability
A Study of Polyether-Polyol-and Polyester-Polyol-Based Rigid Urethane Foam Systems, *July/Aug., p. 201*
New Furniture Foam Test Methods, *Sept./Oct., p. 256*

Thermoset Foam Equipment
A Systematic Approach to a Rigid Urethane Foam Molding Line, *Sept./Oct., p. 270*

Trichlorobutylene Oxide
Trichlorobutylene Oxide Based Flame Retardant Rigid Polyurethane Foam, *Sept./Oct., p. 274*

Upholstery
Quality Vinyl Foam Applications in Home Furnishings, *Jan./Feb., p. 52*

Urethane Foam
A New Approach to the Preparation of Rigid Urethane Having Reduced Flame Spread and Smoker Levels, *Nov./Dec., p. 311*

Urethane Foam Equipment
A Systematic Approach to a Rigid Urethane Foam Molding Line, *Sept./Oct., p. 270*

Urethane Foam—Historical
Recent Significant Advances in Urethane Foam Technology, *Jan./Feb., p. 35*

Urethane Furniture Foams
New Furniture Foam Test Methods, *Sept./Oct., p. 256*

Urethane-Isocyanurate Foams, Modified With Epoxies
Epoxy-Modified Isocyanurate Foams, *May/June, p. 160*
Modified Isocyanurate Foams (II), *July/Aug., p. 194*

Urethane Raw Materials
Polyols and Requirements for Ambient Cure Foams, *Mar./Apr., p. 90*

Urethanes, High Resilience
High Resilience, Flame Resistant Polyether Urethane Foam, *July/Aug., p. 214*

Wall Covering
Quality Vinyl Foam Applications in Home Furnishings, *Jan./Feb., p. 52*

WEP (Water Extended Polyesters)
Properties and Optimization of Polyester-Filler Systems, *Mar./Apr., p. 100*

Journal of Cellular Plastics
